

NGUYEN DOAN TAN MINH

FRONTEND DEVELOPER

Address: Cam Le District, Da Nang City, Vietnam

Email: tanminh0304@gmail.com

Phone: 0777413230

Github: <https://github.com/Jinbaomin>

SUMMARY

I'm a final-year student with a strong passion for frontend development and software engineering. I'm currently seeking an opportunity where I can apply the skills I have gained through coursework, personal projects, and collaborative team efforts. My goal is to make meaningful contributions to real-world projects, continue learning from experienced professionals, and develop into a proficient frontend developer.

EDUCATION

University Of Science And Education

Major: Information Technology

- **GPA:** 3.45/4.0

CORE SKILLS

Technical Skills

- **Programming Languages:** JavaScript, TypeScript, Java
- **Frontend Frameworks:** ReactJS, TailwindCSS, Bootstrap
- **Backend Frameworks:** NodeJS, NestJS, ExpressJS, Spring Boot
- **Database:** MySQL, MongoDB, Redis
- **Tools:** Visual Code, Postman, IntelliJ IDEA, Visual Studio Code, Docker
- **Version Control:** Git, GitHub

Languages

- Vietnamese: Native
- English: **TOEIC 700/990** (Listening & Reading)

Soft Skills: Good English communication, teamwork and collaboration, problem-solving, logical thinking, and time management

PROJECTS

Job Seeking Website - Team Size: 1

Mar 2025 - May 2025

- **Role:** Full-stack Developer
- **Summary:** A recruitment platform that allows users to apply for available positions within a company, while enabling admins to manage companies, job listings, and applicant resumes. The platform utilizes AI to provide chatbot support and suggestions, enhancing the user experience and encouraging more interaction.

- **Responsibilities:**

- Developed backend & frontend architecture with complete CRUD functionality, including filtering, sorting, searching, and validation.
- Integrated Google AI to provide AI-powered chat support and job recommendations.
- Designed and built core features such as user authentication and role-based access control.
- Built interactive statistical dashboards to track user behavior and system performance.
- Utilized Swagger for API documentation to streamline development and testing.

- **Technologies:** ReactJS, Redux, Ant Design, Axios, TailwindCSS, GoogleAI, NodeJS, NestJS, TypeScript, JWT, PassportJS, Mongoose, BcryptJS, MongoDB, Swagger, Git.

- **Source:** https://github.com/Jinbaomin/Job_Seeking

Next-Tech Website - Team Size: 1

Sep 2024 - Dec 2024

- **Role:** Full-stack Developer

- **Summary:** An e-commerce website where users can browse, search, filter, and purchase products. On the admin side, it provides features such as adding and updating products, managing orders and users, and tracking sales through detailed statistics.

- **Responsibilities:**

- Designed and developed full-stack architecture with complete CRUD functionality, including sorting, filtering, searching, and input validation.
- Integrated Redis caching to optimize performance and ensure efficient data handling.
- Utilized Swagger to provide clear, interactive API documentation for development and testing.
- Implemented interactive analytics dashboards for real-time insights into user behavior and system performance.

- **Technologies:** ReactJS, TypeScript, Tailwind CSS, Ant Design, TanStack Query, Axios, Cloudinary, Spring Boot, Spring Security, Spring Data JPA, JWT, Swagger, MySQL, Redis, Git.
