NGUYEN DOAN TAN MINH
BACKEND DEVELOPER

Da Nang City, Viet Nam - tanminh0304@gmail.com - 0777413230

SUMMARY

I'm a senior student with a strong passion for backend development and software engineering. I'm currently seeking an opportunity where I can apply the skills I have gained through coursework, personal projects, and collaborative team efforts. My goal is to make meaningful contributions to real-world projects, continue learning from experienced professionals, and develop into a proficient backend developer.

EDUCATION

University Of Science And Education   9/2022 - 6/2026 (Expected)

Major: Information Technology

- **GPA**: 3.45/4.0

CERTIFICATIONS AND AWARDS

TOEIC: 700 (3/2024)

SKILLS

Technical Skills

- **Programming Skills**: JavaScript, Java
- **Back-end**: NodeJS, ExpressJS, NestJS, Spring Boot, Spring Framework
- **Front-end:** ReactJS, Tailwind CSS, Bootstrap, Ant Design
- **Database**: MySQL, SQL Server, Redis, MongoDB
- **Tools**: Visual Code, Postman, Intellij IDEA, Visual Studio Code, Docker
- **Version Control**: Git, GitHub

Soft Skills

- Ability to read and understand English documents
- Communicate in basic English in daily conversations at work
- Good collaboration and communication skills in team environments
- Strong problem-solving skills and the ability to work independently

PROJECTS

Job Seeking Website - Team Size: 2 - Backend Developer   2/2025 - 4/2025

- **Summary**: A recruitment platform that allows users to apply for available positions within a company, while enabling admins to manage companies, job listings, and applicant resumes.
- **Features**: Source: Implemented user authentication and role-based access control to ensure secure access for both candidates and administrators. The system allows users to browse available job openings and apply directly to positions of interest. On the administrative side, it provides comprehensive tools for managing company profiles, posting and updating job listings, and reviewing candidate resumes. The

backend is secured with JWT, and all APIs are well-documented using Swagger for ease of maintenance and integration.

- **Technologies**: NestJS, NodeJS, TypeScript, JWT, PassportJS, Mongoose, BcryptJS, MongoDB, React, Redux, Ant Design, SCSS, Swagger, Git.
- **Source**: https://github.com/Jinbaomin/Job_Seeking

Next-Tech Website - Team Size: 1 - Fullstack Developer   9/2024 - 12/2024

- **Summary**: An e-commerce website enabling users to browse, search, filter, and purchase products, while allowing admins to manage products, orders, users, and view statistics.
- **Features**: Designed and implemented the backend for an e-commerce platform with features including user authentication, role-based access control, and order management. File uploads for product images were handled via Cloudinary, and the entire API was documented using Swagger for easy reference and collaboration. Integrated Redis for caching and implemented an email service for user notifications.
- **Technologies**: Spring Boot, Spring Security, Spring Data JPA, JWT, ReactJS, Tailwind CSS, Ant Design, TanStack Query, Axios, Cloudinary, Swagger, MySQL, Redis, Git.
- **Source**: https://github.com/Jinbaomin/Ecommerce_Website

Tour Website - Team Size: 1 - Backend Developer   2/2023 - 4/2023

- **Summary**: A dynamic website that allows users to search for and book tours with ease. Additionally, users can manage their personal information and view or modify their booked tours.
- **Features**: Developed the backend of a tour booking platform, incorporating features such as user authentication, role-based access control, tour management, and an integrated email notification system for users.
- **Technologies**: NodeJS, ExpressJS, Mongoose, BcryptJS, JWT, MongoDB, Git.
